NNIT

Sundhedsplatformen (2år)

NNIT

1

2

3

Min oplevelse af sundhedsvæsnet gennem 13 år

**Planlægning
vanskeligt**

Data går tabt

**Ikke tilpasset
mine behov**

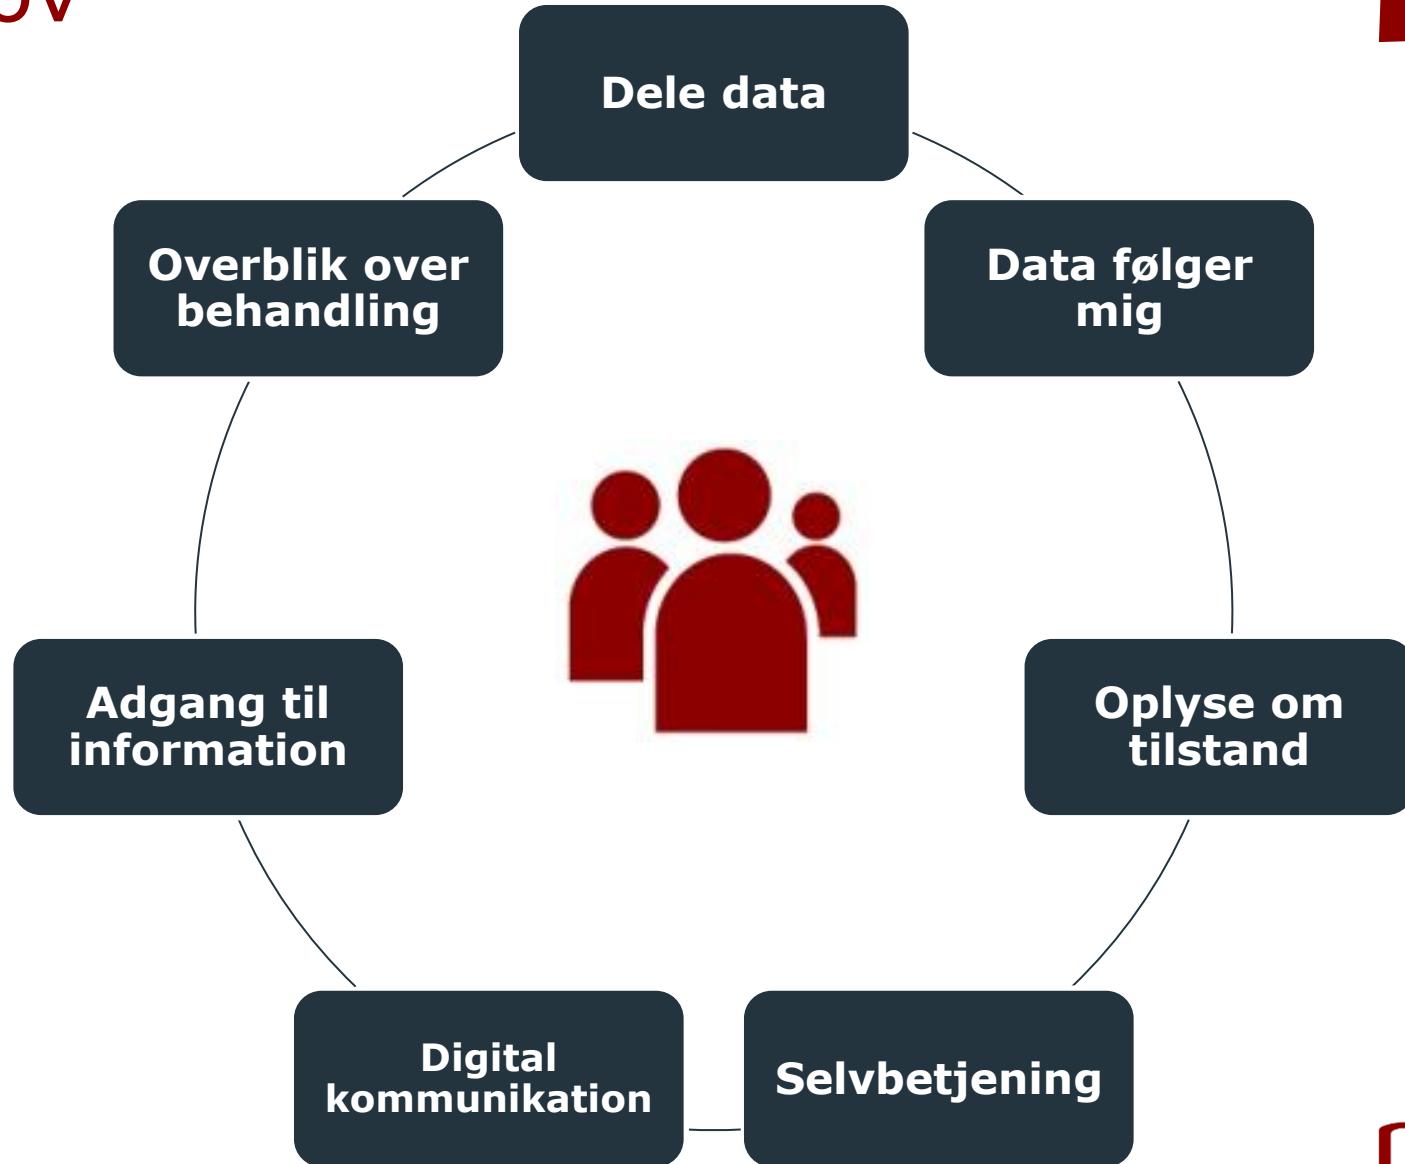

**Manglende
kontinuitet**

Dårlig service

Fragmenteret

Behov

Fragmenteret

Almen praksis

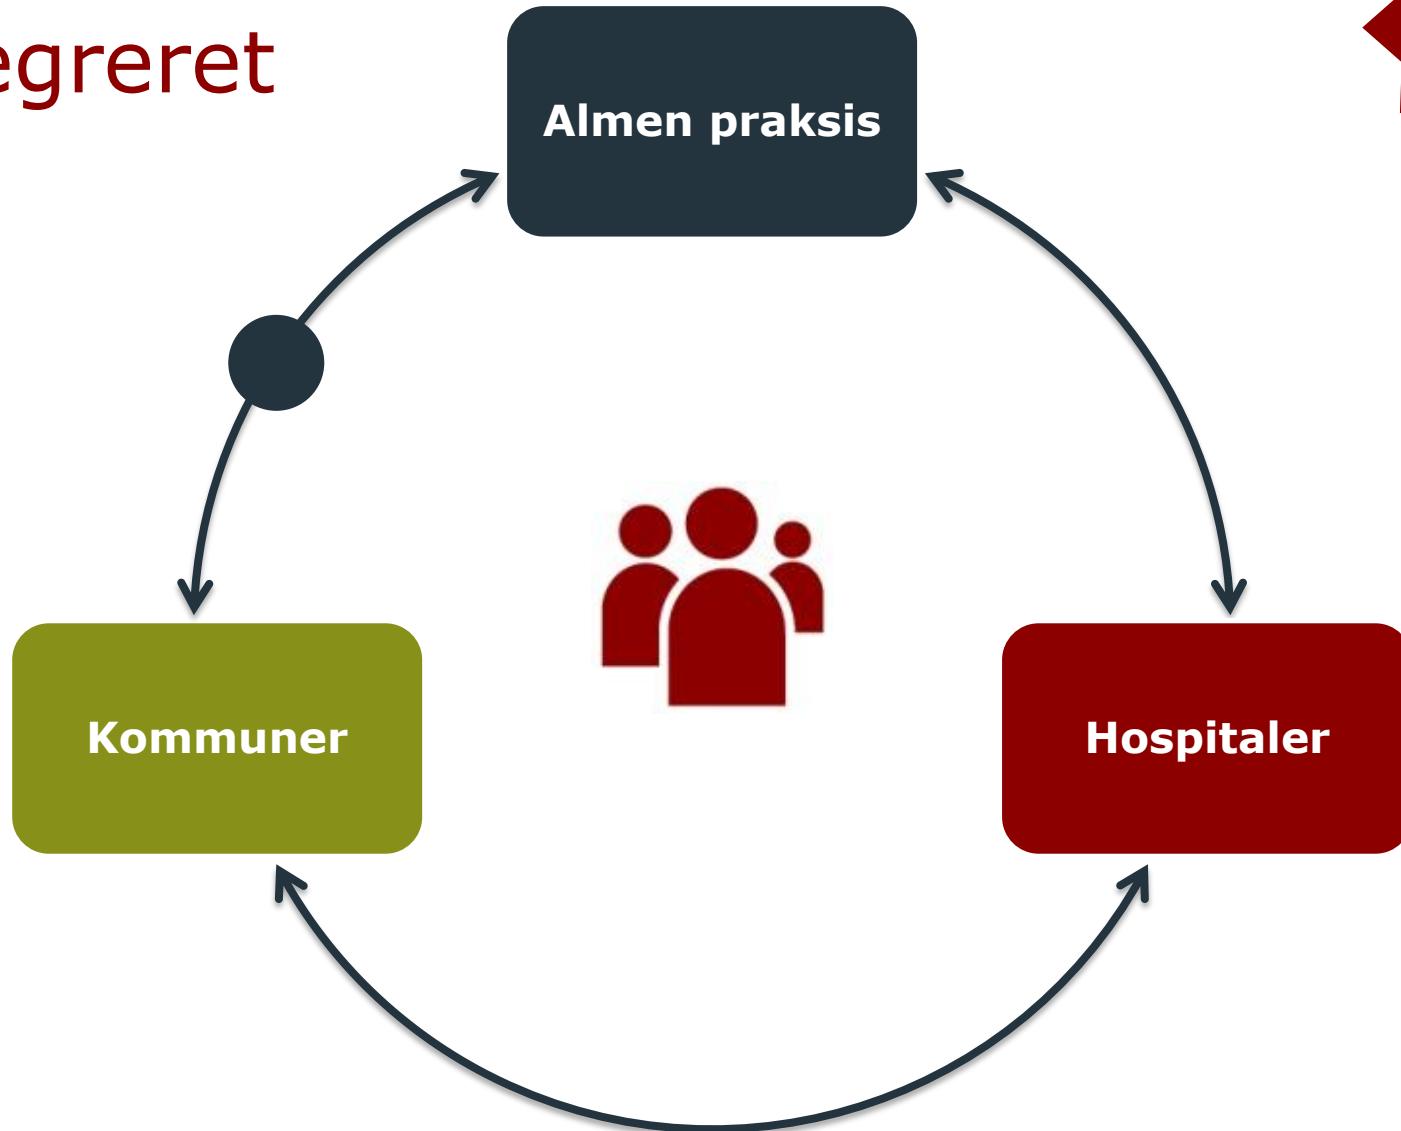

Kommuner

Hospitaler

nnIT

Integreret

2

Patient Empowerment i storskala

Veldefinerede operationelle kriterier og strategier

Nedbrudt fragmentering - Sammenhængende løsninger

Behov skal matches - Data skal følge patienten

Patient skal have ansvar for egen behandling

1.200 kronikere

1.5 millioner kronikere

3

Epic

Sundhedsplatform Patient portal (Epic MyChart)

EpicCare Link - på tværs af sektorer

- Pilot med kommuner med patienter på Herlev Hospital
- Giver eksterne sundhedsprofessionelle læseadgang til patientinformationer i Sundhedsplatformen
- Webbaseret løsning (Tilgår fra en browser)

Afrunding

Behov

- **Borgeren i centrum - Data følger borgeren**
- **Engagement og inddragelse i egen behandling (mere ansvar)**
- **Matche borgerens behov**

Udfordring

- **Fragmenteret sundhedsvæsen**
- **Mangler veldefinerede operationelle strategier og kriterier for storskala**
- **Stor opgave – der er ingen der har opskriften på det**

Løsning

- **Nedbrudt fragmentering – løsninger på tværs af sektorer**
- **Patient i centrum og mere behandlingsansvar**
- **F.eks. Sundhedsplatformen (MyChart Patient portal), EpicCare Link og OpenTele**

LinkedIn Showcase page

The screenshot shows the LinkedIn Showcase page for NNIT Public & Healthcare. At the top, there's a banner featuring three portraits of people: a young woman on the left, an elderly man in the center wearing glasses, and another woman on the right. Below the banner, the company name "NNIT Public & Healthcare" is displayed in large white text on a dark red background, with the tagline "Vi sætter mennesket i centrum" underneath. To the left of the company name is a logo depicting a silhouette of a person holding a child. On the right side of the banner, it says "265 followers" and has a "Following" button with a checkmark. Below the banner, there's a section with text about digitalization and IT's role in making life easier for citizens. It lists the website as <http://www.nnit.dk/Sider/offen...> and the industry as Hospital & Health Care. To the right, there's a "Followers in your network" section showing six profile pictures of people connected to the user. Further down, there are two news items: one about NNIT attending an Epic User Group Meeting and another about Terese Otte-Trojel successfully defending her PhD at Erasmus University.

Vi har en holdning til digitalisering og hvordan IT kan være med til at gøre livet lettere for den enkelte borgere. Siden administreres af Nina Maj Fjordvald, Birgitte Agergaard og Jakob Routhe.

NNIT Public & Healthcare NNIT har været på besøg hos Epic til deres årlige User Group Meeting, sammen med en masse af Epic's andre kunder. Dette er Epic's enorme auditorium med plads til 12.000 personer, meget imponerende!

NNIT Public & Healthcare Terese Otte-Trojel, Business Consultant in Public & Healthcare Advisory successfully defended her PhD obtained at the Erasmus University in the Netherlands and UC Berkeley on Friday September 11. Her PhD topic was patient portals and their... more
